Pet Hackford, Division Director, Boiler, Elevator and Coal Mine Safety
Rick Sturm, Chief Boiler Inspector, Boiler, Elevator and Coal Mine Safety
Ami Windham, Business Analyst, Boiler, Elevator and Coal Mine Safety
Sara Danielson, Administration

Public in Attendance:

None

Open Meeting Convened:

Deputy Commissioner Maughan welcomed everyone and requested everyone identify themselves for the record.

Business Items:

R616-2-3 Safety Codes for Boilers and Pressure Vessels

Deputy Commissioner Maughan asked Rick Sturm, Chief Boiler Inspector for the Division of Boiler, Elevator and Coal Mine Safety to present the rule change.

Mr. Sturm explained that this rule change is to adopt the 2013 ASME Boiler and Pressure Vessel Code, Sections I, IV and VIII, and the ASME CSD 2012 code except part CG-130 and the NBIC Part 3. Mr. Sturm explained that there are a small number of editorial changes and only 2 substantial changes. The first substantial change is in the CSD – multiple boilers may no longer be joined on vents and bleed lines for fuel trains. The second substantial change is in ASME Section I, Part PR which requires electric element supports be manufactured by and purchased from a stamp holder.

No public comments were made.

The Commission will proceed with submitting this rule change to the Division of Administrative Rules. It can become effective March 10, 2014.

Meeting Adjourned at 9:05 a.m.
