FATAL WORK INJURIES IN UTAH DECREASED DURING 2020

Salt Lake City – The Utah Labor Commission’s Division of Occupational Safety and Health Bureau of Labor Statistics (UOSH BLS), in conjunction with the United States Department of Labor’s Bureau of Labor Statistics (BLS), has released the 2020 fatal occupational injury data for Utah. The information was obtained through the annual Census of Fatal Occupational Injuries (CFOI) administered by UOSH BLS.

The CFOI produces comprehensive, accurate and timely counts of fatal work injuries. To compile counts that are as complete as possible, the census uses multiple sources to identify, verify, and profile fatal worker injuries. Information about each workplace fatal injury—occupation and other worker characteristics, equipment involved, and circumstances of the event—is obtained by cross-referencing the source records, such as death certificates, workers' compensation reports, and Federal and State agency administrative reports. The scope of CFOI incidents includes accidents, homicides and suicides that occur at the workplace. For additional details regarding CFOI criteria, please visit <https://www.bls.gov/iif/cfoiscope.htm>.

HIGHLIGHTS OF 2020 RESULTS
